Juan Agustín Vrancic

[UX/UI Designer]

Hi there! I'm glad you are looking at my profile.

I am professional, highly motivated UX/UI Designer, passionate about everything i work on. Currently based in Argentina. As an art lover, I try to apply my creativity through design. My main focus is to create solutions to people's day-to-day problems through digital experiences.

Furthermore, I try to stay abreast of emerging trends and best practices in UX/UI design, I believe continuous learning is the key to success.

Difficulties are challenges, attitude towards problems and my ability to solve them quickly make me stand out in everything I do. I love meeting new people, learning from them and contributing to agile teams.

Experience

Set & Forget (Head of Design) January 2024 - Current

- Leading design team and projects of Set and Forget clients.
- Creating and projects emphasizing automation.
- Wireframe, prototyping, high-fidelity designs for web and mobile app.
- Re-branding of Set and Forget, new landing page and automation projects
- Marketing's team designer.

Forget Our Clients

we worked on a platform for our clients where they can see in a dashboard the tasks to be performed by all parts of the team, also know when we have meetings with them and functionalities like seeing their invoices all in one place.

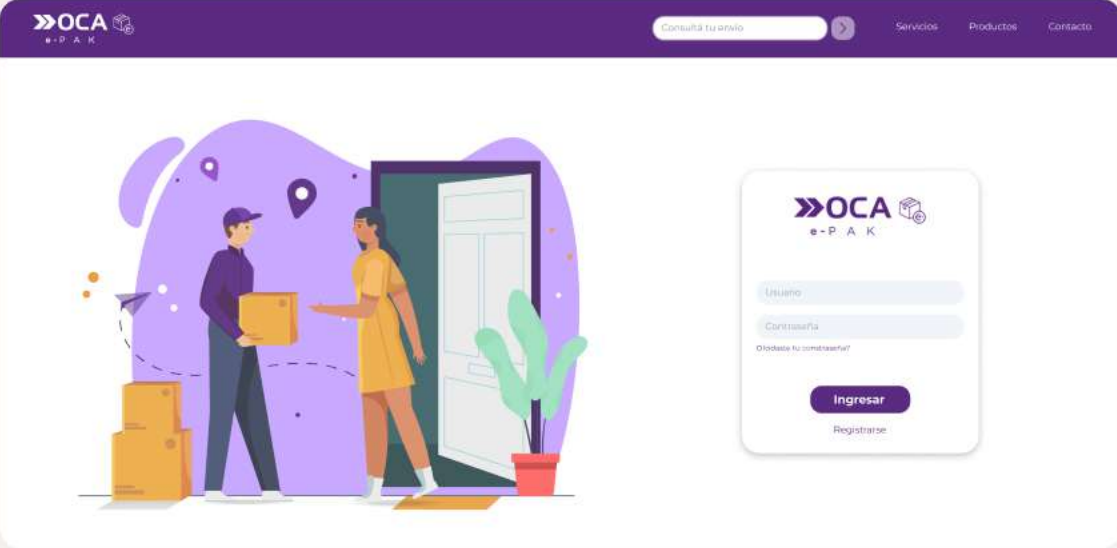

my challenge

Think of a UI that fits every clients need of info about our work without harming UX

IT Patagonia (Sr. UX/UI Designer) March 2023 - December 2023

- Leading iteration and design of IT Patagonia's internal platforms.
- 5 months as UX/UI Designer working B2B with Correos OCA.
- Wireframe, prototyping, high-fidelity designs for web and mobile app.
- Design System for new responsive websites.
- Collab with developers to ensure design consistency.

OCA's website Redesign

We worked for months with OCA's devs team to redesign some of their websites. My role was to generate the redesigns, wireframes and design system based on client feedback and the old design which did not meet any usability standards.

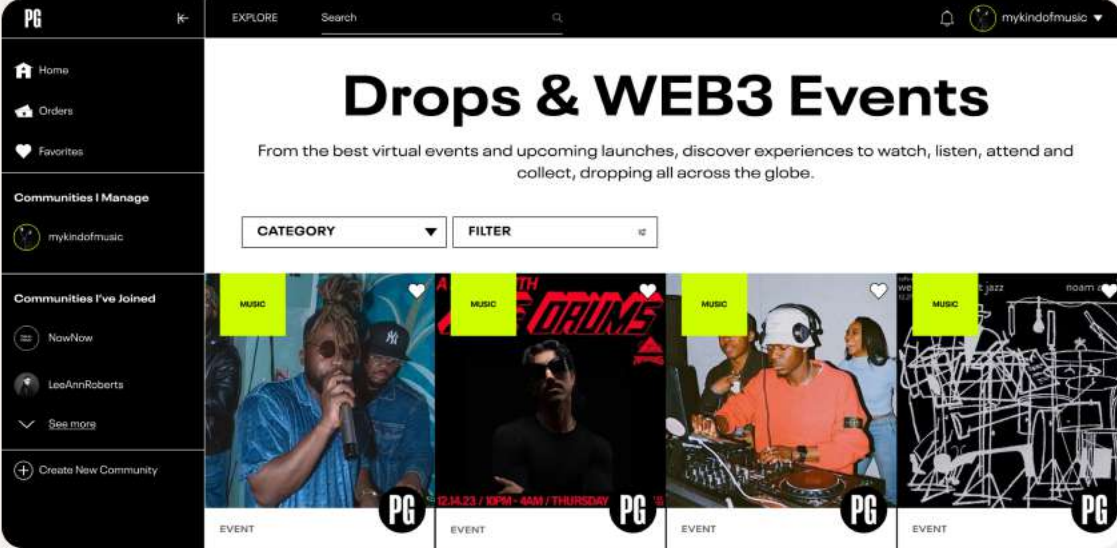

my challenge

Redesign a cluttered and overwhelmed inetrface.

Playground (UX/UI Designer) Febraury 2023 - March 2024

- Creation of wireframes and designs for various sections and landing pages.
- My responsibilities included developing responsive designs and implementing authenticity verification protocols for both "creators" and "users".
- Ensuring seamless user experiences and maintaining design authenticity across the platform.

Playground website

Playground is a web3 website for communities and cultures where people find drops and events of music, art, nft and crypto, etc.

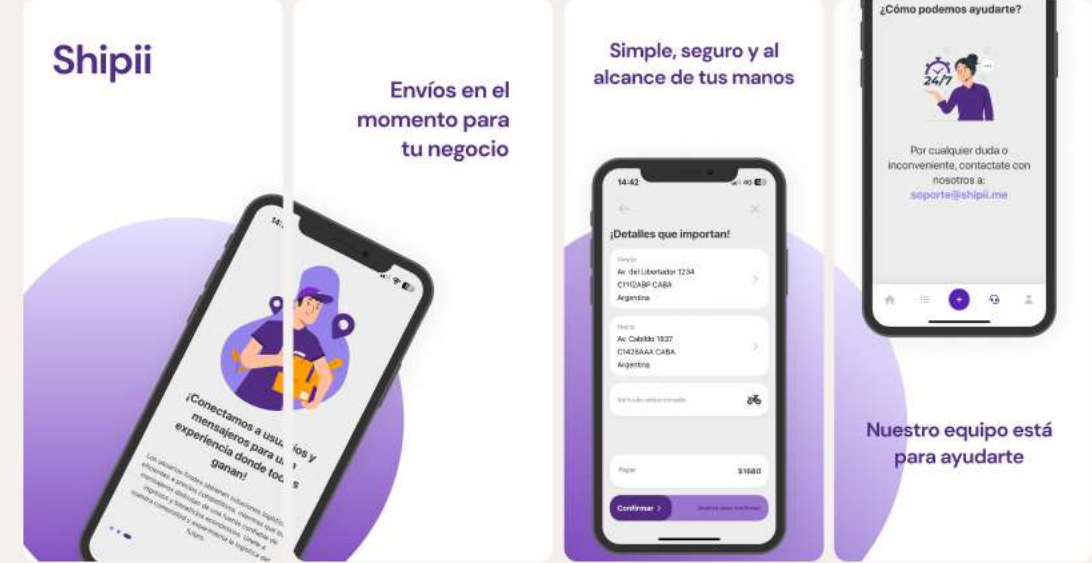

my challenge

Creation, iteration and design of new features for our users

Qualita (UX/UI Designer) January 2021 - July 2023

- Defining design goals and strategies for new products and features.
- Identify users behaviors and patterns, UX Research, Design Thinking, informaction architecture, userflows, wireframing and prototyping.
- Principal designer in projects such as Shipii, SVN Designs, Paid, Touring.
- Visual identity and design system of every app we create.

Shipii

Created to help e commerce to reach their customers quickly and securely on the same day. Is a new experience of connection between the seller and the buyer.

Team's challenge

Create a dual app that meets the needs of two different users.
